Secretary Ministry of Health

Dear Sir

1437948

Attn: Officer in Charge Foreign Trainings

JUN 2023

Training Course on Telemedicine for B&R Countries From 24 July to 13 August 2023 in China

The Economic and Commercial Office of the Embassy of the People's Republic of China (PRC) in Sri Lanka has invited nominations from the eligible government officials for the above programme. The course details in this regard are enclosed.

We would highly appreciate, if you could instruct the relevant officials to circulate this programme among the Departments/Divisions/Institutes under your purview and submit <u>four most suitable nominations</u> to the Department of External Resources (ERD) with the following documents;

- Nomination Letter (from the relevant Ministry)
- Duly filled Application Form computer fill-in edition (can be downloaded from www.erd.gov.lk)
- Physical Examination Form (can be downloaded from www.erd.gov.lk)
- Copy of Passport
- Duly filled ERD Form (can be downloaded from www.erd.gov.lk)

Please note that, only the duly completed applications received by ERD before 2.00 p.m. on 24 June 2023 with the line ministry covering letter and other relevant documents as stipulated above will be processed.

Further, the Government of China will bear the following expenses:

- Roundtrip international air tickets and local transportation
- Accommodation and Meals
- Personal accident insurance during the training
- Medical expenses for emergencies during the training

Your early response in this regard is highly appreciated.

Yours faithfully

Udeni Udugahapattuwa Additional Director General for Director General

Training Course on Telemedicine for B&R Countries

| Objectives of the Training Course | The development of telemedicine is an important measure to promote the integration and sharing of regional medical resources, to promote the sinking of high-quality medical resources and to reduce the cost of medical treatment for patients. In recent years, China has made outstanding achievements in telemedicine, especially during the COVID-19, telemedicine has been rapidly developed and widely used, and it is playing an important role in protecting people's health. The purpose of this training course is to introduce the development status of China's telemedicine, the related knowledge and technologies, including remote communication technology, Internet of Things technology, holographic imaging technology, computer multimedia technology, etc. So that, the trainers can gain an in-depth understanding of how to use telemedicine to overcome geographical and spatial barriers, to promote the circulation of high-quality medical resources between regions.
